

TESTIMONIAL

Jemel W.

So happy that I went to PMR after my car accident. I was able to have a doctor evaluate my injuries right away. They took xrays and provided me with a diagnosis and the immediate care that I needed.

Toni B.

I had a very positive experience treating at PMR. The doctors and staff really listened to me and were eager to adjust to my changing needs. I made a smooth recovery.

Jerry O.

A really great team of providers and support staff! They go out of their way to make you feel better as you move through your treatment program and healing process.

Getting the right care, at the right time is everything

Failing to seek treatment after a car accident can cause greater health issues down the road. Latent injuries in the soft tissue like whiplash and back pain are common after an impact. This means that you may not feel pain right away, but injury is present. There are many therapies that can help you recover fully and quickly from these injuries. If you have been in an accident it is important to seek medical attention right away to help avoid future health complications.

Walk In for immediate care or make a Same Day Appointment

We can take your x-rays onsite and provide you with a proper diagnosis and treatment right away.

No ride? No problem. We can provide you with transportation to and from your daily therapy appointments.

Professional Excellence

In Injury, Spine, Muscle & Joint Care

Alexander Kurbanov, MD

"Patients with musculoskeletal injuries after accidents require comprehensive and multifaceted care which a few providers offer. Over the years we have found a successful combined approach of physiotherapy modalities, medications and injection therapy together with chiropractic techniques for our patients leading to a very high rate of complete recovery and superior patients' experience during the treatment."

Jennifer Wallace, NP

"Many people are in shock after being involved in an accident such as a car crash. As the shock wears off, patients often realize that they are in both physical and emotional distress. That's where I come in. As a healthcare provider, my goal is to provide a safe and comfortable environment where patients can voice their concerns and get the care they need and deserve."
